**Description, Pages** 

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	6-11	• -	as originally filed			
	1-5		received on 04.08.2004 with letter of 04.08.2004			
			·			
	Clai	ms, Numbers				
	1-10	•	received on 04.08.2004 with letter of 04.08.2004			
	Clai	ms, Pages				
	12,		received on 04.08.2004 with letter of 04.08.2004			
	· <b>_,</b>					
	Drav	wings, Sheets				
	1/2-2	2/2	as originally filed			
2.	With lang	With regard to the <b>language</b> , all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.				
These elements were available or furnished to this Authority in the following language: , which is:						
		the language of a trar	nslation furnished for the purposes of the international search (under Rule 23.1(b)).			
		the language of public	cation of the international application (under Rule 48.3(b)).			
		the language of a trar Rule 55.2 and/or 55.3	nslation furnished for the purposes of international preliminary examination (under			
3.	With regard to any <b>nucleotide and/or amino acid sequence</b> disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:					
		contained in the inter	national application in written form.			
		filed together with the	international application in computer readable form.			
		furnished subsequent	tly to this Authority in written form.			
		furnished subsequently to this Authority in computer readable form.				
		The statement that the in the international ap	e subsequently furnished written sequence listing does not go beyond the disclosure oplication as filed has been furnished.			
		The statement that the listing has been furnished	e information recorded in computer readable form is identical to the written sequence shed.			
4.	The	amendments have re	sulted in the cancellation of:			
		the description,	pages:			
		the claims,	Nos.:

### INTERNATIONAL PRELIMINARY **EXAMINATION REPORT - SEPARATE SHEET**

#### Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document:

D1: US 2001/015718 A1 (BATHICHE STEVEN N ET AL) 23 August 2001 (2001-08-23)

The document D1 is regarded as being the closest prior art to the subject-matter 1. of claim 1, and shows (the references in parentheses applying to this document):

a method of navigating in a virtual three-dimensional environment in an electronic device (paragraph 64), wherein a movable physical member is controlled by applying a finger of a user to the movable physical member (paragraph 75-76, 108) and wherein navigation in one direction (paragraph 167) is achieved by removing the finger from the movable physical member and re-applying it to the movable physical member within a set time limit (paragraph 151).

The subject-matter of claim 1 differs from this known method in that a step upwards in a virtual three-dimensional environment is achieved by removing the finger from the movable physical member and re-applying it to the movable physical member within a set time limit.

The subject-matter of claim 1 is therefore new (Article 33(2) PCT).

The problem to be solved by the present invention may be regarded as providing 2. the capability of moving a step upwards in a hierarchy of commands quickly and in an efficient way to the user.

The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:

The navigation directions achieved by the method disclosed in D1 all lead to the display of additional information when the finger is re-applied to the movable physical member. There are no teachings in D1 pointing to this type of navigation, and such a step upwards must be achieved by depressing other buttons.

### INTERNATIONAL PRELIMINARY

**EXAMINATION REPORT - SEPARATE SHEET** 

A similar reasoning can be applied to independent claim 3, since its contains subjectmatter corresponding to the subject-matter of claim 1. Therefore, also claim 3 is novel and inventive.

Claims 2 and 4 to 10 are dependent on claims 1 and 3 respectively, and as such also meet the requirements of the PCT with respect to novelty and inventive step.
